MIDIVERSE MODULAR

Frequency indicator LED

Frequency knob

Influencing control voltage attenuator when a signal is present at the CV IN jack
Down = Less influencing control voltage
Up = More influencing control voltage

This slider changes the shape of the waveform present at the SHAPE OUT jack
Down = Triangle
Up = Square (ish)
Slider also acts as an attenuator when a signal is present at SHAPE CV IN jack

Frequency range switch
Slow/Fast

Influencing control voltage input

Variable waveform shift control voltage input

Variable waveform output

Triangle waveform output
